### Evaluation of the applicant's scholarly/artistic qualifications

Vojtěch Peřina, MD., MD., Ph.D. completed his studies at Dentistry and General Medicine at the Faculty of Medicine, Masaryk University, Brno, in 2002 and 2006, respectively. After graduation, he started his clinical career at the Clinic of Stomatology, Faculty of Medicine and St. Anne's University Hospital, where he worked until 2005. Since then, he has been working at the Department of Oral and Maxillofacial Surgery, Faculty of Medicine, and University Hospital Brno. In 2010, he received his Ph.D. degree from the Faculty of Medicine, Masaryk University, for his dissertation, on the topic "Possibilities of osteoporosis screening using orthopantomographic radiographs". He obtained specialized qualification in Oral and Maxillofacial Surgery in 2013. Dr. Peřina has held the position of head of the Department of Maxillofacial Surgery University Hospital Brno since 2022 and is an assistant professor at the Department of Oral and Maxillofacial Surgery of the Faculty of Medicine, Masaryk University.

Dr. Peřina's research qualification is documented by his authorship or co-authorship of 24 articles published in medical journals, and in 14 of which, he was the first or corresponding author. Among these, 9 articles were published in journals with impact factor, and in 4 of them, he was the first or corresponding author. Dr. Peřina also presented his contributions at many national and foreign conferences. The number of citations according to WOS is 34, and the value of his Hirsch index value is 4.

Dr. Peřina was a principal investigator in one already-finished grant project of the Grant Agency of the Czech Republic (GACR/102/11/0318, 2011–2013). He is also a member of the committee of the Maxillofacial Surgery Society, and a member of the board of directors of the Czech Dental Chamber and its scientific board.

Based on the mentioned above, it can be concluded that Dr. Peřina is an experienced clinician, university teacher, and researcher with a proven impact on science in the field of Stomatology.

**Conclusion:** The applicant's scholarly/artistic capabilities **meet** the requirements expected of applicants participating in a habilitation appointment procedure in the field of Stomatology.

### Evaluation of the applicant's pedagogical experience

Vojtěch Peřina, MD., MD., Ph.D. has been regularly participating in teaching pregraduate students (study program Dentistry) at the Faculty of Medicine, Masaryk University, Brno, since 2002 till now. He is currently working as an assistant professor at the Department of Oral and Maxillofacial Surgery, Faculty of Medicine, and University Hospital Brno. He is a co-author of 2 peer-reviewed pedagogical publications and 7 popularizing teaching materials.

**Conclusion:** The applicant's pedagogical capabilities **meet** the requirements expected of applicants participating in a habilitation appointment procedure in the field of Stomatology.

### Habilitation thesis evaluation

Dr. Peřina's habilitation work summarizes his long-term professional interest in the field of Stomatology. The work is written as an annotated summary of 7 publications focused on two main topics: a) Medication-related osteonecrosis, b) COVID-19 disease among dentists. The topic of drug-induced osteonecrosis is supported by 4 published works. The part of the habilitation thesis devoted to the impact of the COVID-19 pandemic on dental care in the Czech Republic is supported by 3 publications. It is also necessary to highlight the applicant's authorial involvement in the creation of recommendations issued by the Czech Dental Chamber with practical outputs for the organization of the dentist

's work during pandemic situation. Similarly, the knowledge gained in the field of diagnostics and therapy of drug-induced osteonecrosis can be applied in clinical practice.

The habilitation thesis was reviewed by three respected experts in the field of stomatology or oncology, who all agreed that it presents new knowledge in dentistry, meets the standard requirements and has significant scientific importance.

**Conclusion:** The applicant's habilitation thesis **meets** the requirements expected of habilitation theses in the field of Stomatology.

### Secret vote results

Voting took place: electronically

Number of board members		5
Number of votes cast		5
of which	in favour	5
	against	0

### Board decision

Based on the outcome of the secret vote and following an evaluation of the applicant's scholarly or artistic qualifications, pedagogical experience and habilitation thesis, the board hereby submits a proposal to the Scientific Board of the Faculty of Medicine of Masaryk University to **appoint the applicant associate professor** of Stomatology.

In Brno on 04.05.2024

prof. MUDr. Lydie Izakovičová Hollá, Ph.D.
